SUMMARY

I'm a software engineering student with expertise in software testing, proficient in Cypress for rigorous testing and UiPath for RPA automation. I've delivered successful projects, showcasing my ability to streamline processes and drive efficiency. With a passion for innovation and a strong technical foundation, I'm equipped to excel in any testing or automation role.

TECHNICAL TOOLKIT:

- **Testing:** Proficient in Cypress and Postman for comprehensive testing solutions
- **RPA:** Skilled in UiPath for automating repetitive tasks and enhancing productivity
- **Agile Methodologies:** Scrum framework
- **Web Analytics and Tracking :** Google Analytics
- **Full-stack:** Proficiency in JavaScript, React, PHP, Laravel, C#, ASP.net, Java, and Spring Boot for end-to-end development capabilities

EDUCATION & CERTIFICATION

College of Applied Sciences, Oujda (2020-2025)

Software engineering

UIPATH Automation Explorer

Cypress path

UIPATH

Test Automation University

PROFESSIONAL EXPERIENCE

COMPANY HPS

Casablanca

Software Engineering Testing Intern

07/2023 – 09/2023

- Spearheaded the migration from Protractor to Cypress, automating repetitive tasks to expedite the process.
- Accelerated testing procedures by implementing Cypress, ensuring comprehensive end-to-end testing coverage.
- Streamlined workflows and increased efficiency by eliminating manual processes through automation.

Projects

- **Web Data Extraction to Excel**

UiPath Automation Project

Developed UIPATH automation for web data extraction, efficiently retrieving product details (name, price, URL) from multiple e-commerce pages, including search functionality.

- **Developing Automated Tests for Website UI and API**

Postman, cypress

Implemented full testing for a cinema website using Cypress for frontend and Postman for API, ensuring comprehensive coverage and functionality.

- **Cinema Reservation Platform.**

React, Laravel API, Stripe

Built an online movie ticket platform allowing users to browse, reserve tickets, select seating and optional food, and receive unique QR-coded invoices upon payment.

- **Building a Hackathon Management Platform**

REACT, ASP.NET, Cypress

Developed an end-to-end competition management platform where users can join competitions and organizers can create, manage submissions, and validate entries entirely online

EDUCATION & OTHER

LANGUAGES: English, French and Arabic.

INTERESTS: Sport, Swimming.
