SUMMARY

I am a software engineering, passionate about automated testing and full-stack web development, as well as task automation. My enthusiasm and eagerness to explore new solutions demonstrate my commitment to innovation in the field of computing

TECHNICAL TOOLKIT:

- **RPA:** Skilled in UiPath for automating repetitive tasks and enhancing productivity
- **Testing:** Proficient in Cypress and Postman for comprehensive testing solutions.
- **Full-stack:** Proficiency in JavaScript, React, PHP, Laravel, C#, ASP.net, Java, and Spring Boot for end-to-end development capabilities

EDUCATION & CERTIFICATION

College of Applied Sciences, Oujda (2020-2025)

Software engineering

UIPATH Automation Explorer

Cypress path

UIPATH

Test Automation University

PROFESSIONAL EXPERIENCE

COMPANY HPS

Casablanca

Software Engineering Testing Intern

07/2023 – 09/2023

- Spearheaded the migration from Protractor to Cypress, automating repetitive tasks to expedite the process.
- Accelerated testing procedures by implementing Cypress, ensuring comprehensive end-to-end testing coverage.
- Streamlined workflows and increased efficiency by eliminating manual processes through automation.

COMPANY AnotherBot

Casablanca

Software Engineering Intern

07/2024 – 10/2024

- Developed a vehicle fleet management website to help companies easily manage their vehicles.
- Automated testing using Cypress for the website to ensure functionality and performance.
- For the backend testing, I used Postman to verify the API endpoints and interactions.

Projects

- **Web Data Extraction to Excel** UiPath Automation Project
Implemented UiPath automation to efficiently extract product details (name, price, URL) from various e-commerce pages, including search functionality. This automation led to an 95.41% reduction in time compared to manual extraction methods.
- **Personalized Internship Email Automation** UiPath Project
Automated personalized internship email outreach with UiPath, reducing sending time by approximately 98.33%. Extracted recipient details from Excel for tailored emails and attached customized CVs and motivation letters.
- **Developing Automated Tests for Website UI and API** Postman, cypress
Implemented full testing for a cinema website using Cypress for frontend and Postman for API, ensuring comprehensive coverage and functionality.
- **Cinema Reservation Platform.** React, Laravel API, Stripe
Built an online movie ticket platform allowing users to browse, reserve tickets, select seating and optional food, and receive unique QR-coded invoices upon payment.
- **Building a Hackathon Management Platform** REACT, ASP.NET, Cypress
Developed an end-to-end competition management platform where users can join competitions and organizers can create, manage submissions, and validate entries entirely online

Leadership / Extracurricular

Logistics Manager, Software Engineering Club

Led logistics operations for the Software Engineering Club at ENSAO, overseeing event planning and execution.

Languages && Interests

LANGUAGES: English, French and Arabic.

INTERESTS: Sport, Swimming.
